---

- » Freespeech is a phone service which uses your broadband connection instead of a regular phone line.
- » Once installed, Freespeech works just like a regular phone service. You can optionally add real phone numbers so people can call you.
- » It does not affect any existing phone service you might already have. It can be used without changes to your installed BT phone line, for example.

Â Because Freespeech is more advanced than a regular phone service there are some real advantages

- Free and low cost calling worldwide.
- Portability - use it anywhere there is broadband, even abroad.
- Software or Hardware phones – you can use a PC application or install a real phone.

Â

For more great features and benefits see the [features section](#) of our website.

## Getting Started

- » Sign up for a free account ([here](#)).
- » Download the free software phone on your PC ([here](#))

Or

Sign up for an '[Unlimited Option](#)' and get a free [freebox](#).Â

Or

Purchase SIP compatible VoIP hardware device from a VoIP hardware provider (Note: Freespeech do not sell hardware).

- » Configure the phone with your Freespeech account details and start calling. (we provide a number of guides for popular hardware on our website - [here](#))
- » If you wish to call regular phones (mobile or landline) and benefit from enhanced service you will need to upgrade to a [paid option](#). There are a number of billing plans to suit, none will lock you into long term contracts or penalties if you cancel or change. All billing is CREDIT CARD ONLY.
